ENVIRONMENTAL

SINGLE-SOURCE SOLUTIONS

From the decontamination and demolition of process facilities - to an emergency response for chemical or petroleum releases - to asbestos, lead and mold abatement, BELFOR Environmental is the premier provider of single-source environmental services in the United States. BELFOR Environmental has the experience, resources and equipment to respond and mitigate any environmental challenge on any scale.

EMERGENCY SERVICES

Emergency Services are the foundation of our business. BELFOR Environmental specializes in serving clients in need of an immediate response 24 hours a day, 365 days a year. OSHA-trained teams rotate on a 7-day schedule to ensure rapid response, stabilization and cleanup of any hazardous material spill.

BELFOR Environmental maintains “pre-stocked” trucks and trailers loaded with equipment and materials for most chemical and petroleum spills - whether land or water-borne. The vehicles are equipped with supplied air respirators and air purifying respirators; chemical pumps, containment booms, generators, and instrumentation; splash suits, disposable coveralls, chemical gloves, and deluge showers/eyewash stations; 85-gallon, 55-gallon and 15-gallon steel and poly over pack drums; and, sorbent materials, poly sheeting and an array of cleanup tools and materials.

TRANSPORTATION INDUSTRY

BELFOR Environmental managers are knowledgeable of complex transportation and disposal regulations that apply to any situation involving hazardous material and waste.

Services:

- Truck Crashes
- Leaking Tankers
- Fuel Releases
- Product Transfers
- Load Shifts
- Leaking Containers
- Asbestos and Lead Abatement
