

# ABATEMENT SERVICES

## ENVIRONMENTAL SOLUTIONS

### ABATEMENT

Whether your property is contaminated with asbestos, lead, mold or hazardous soil, BELFOR Environmental manages hundreds abatement projects annually.

We have developed and designed abatement service programs to provide cost-effective solutions for all types of hazardous materials including:

- Asbestos
- Lead
- Mold
- Contaminated Soil
- Hazardous Waste
- Chemical Removals
- Structural or Equipment Decontamination and Demolition

In addition to standard asbestos services, we excel at abatement projects that have been complicated by other regulated hazardous materials. BELFOR Environmental is qualified to provide decontamination and demolition, soil or other material removal, or nearly any other mitigation service involving most hazardous materials.

Jobs are evaluated on an individual basis with confidentiality and discretion. Our managers oversee each project from start to finish, regardless of size.

### EXPERIENCE MATTERS

With decades of experience, our asbestos, lead and mold remediation teams are considered the best in the industry.

From small residential to large sophisticated industrial work throughout the United States, our clients include industrial, commercial, government, healthcare, power, petroleum, and steel industry companies.

Homeowners and property managers can also rely on BELFOR Environmental for solutions to any environmental issue including asbestos cleanup and removal, lead paint removal, and mold remediation.

We offer comprehensive service - from the cleanup and removal of hazardous materials to indoor air quality and final clearance testing.

### SPECIALIZED TRAINING

All of our employees have been trained as required under OSHA regulations. We provide all of the required permitting and notification as mandated by various local, state and federal agencies.

### SPECIALIZED TRAINING
