

# IN-PLANT FACILITY SERVICES

## ENVIRONMENTAL SOLUTIONS

### FACILITY SERVICES

Companies are under constant pressure to meet consumer demand. Even a small hiccup or delay can inhibit their ability to deliver goods and product in a timely and cost-effective manner. Some in-plant services can or must be outsourced to professionals.

Industrial, manufacturing and facility maintenance services are an important part of BELFOR Environmental's service expertise.

### HAZARDOUS WASTE REMOVAL

Waste removal or waste management, with its associated regulatory issues, is an important part of any environmental project. The BELFOR Environmental team can manage all aspects of waste removal and disposal for your company/site while working together with your facility team to reduce downtime and potential health risks. Our goal is to provide the best total value or our clients with the safe and efficient removal of hazardous waste.

### DECONTAMINATION AND DECOMMISSIONING

BELFOR Environmental offers complete turnkey solutions for In-Plant Decontamination and Full or Partial Facility Decommissioning services. We help clients:

- Identify and/or measure contaminants present
- Disassemble and decontaminate surfaces, equipment, etc.
- Safely distribute waste products to disposal or recycling facilities
- Appraise and liquidate equipment
- Remove cables, conduit wiring and piping
- Demolition services as needed

We offer decontamination and demolition of tanks, piping, pumps, process equipment, support and super-structures, and most other surfaces.

Our technicians are experienced with sites containing heavy metals, reactive chemicals, PCBs, asbestos, dioxins, acids, organic solvents, petroleum, radioactive contaminants, and other environmentally sensitive materials.

Our methods include:

- Low-concentration chemical processes
- High-pressure cleaning mechanisms
- Ultrahigh-pressure water processes
- Strippable coatings
- Liquid abrasives
- Power Washing
- Scarification
- Solvent Foam Extraction
- Grit Blasting
- Dry Ice Blasting

### SELECTIVE DEMOLITION

Selective demolition of a building or facility can be complex and requires specialized training and precision.

BELFOR Environmental provides selective demolition services, in concert with existing abatement or remediation services.

We own and maintain our own equipment and employ experienced operators. We can demolish structures after clearances have been issued. With the addition of an excavator, we can also tackle interior demolition for buildings up to three-stories high.
