- Demolition Services

EMERGENCY RESPONSE SERVICES

Emergency Response Services are the foundation of our business. We specialize in serving clients in a variety of industries including municipalities, healthcare, rail and highway transportation, utilities and more. Our OSHA-Certified employees are among the best trained personnel in the industry. They rotate on a 7-day schedule to ensure rapid response, stabilization and cleanup of any hazardous material spill - 24 hours a day, 365 days a year.

ABATEMENT SERVICES

BELFOR Environmental manages hundreds of abatement jobs annually. Our abatement services provide cost-effective solutions for most hazardous materials including mold, asbestos, lead, hazardous chemicals and materials, contaminated soil and more.

HAZARDOUS WASTE MANAGEMENT

The removal of hazardous waste and associated regulatory issues are an important part of any BELFOR Environmental project. We are knowledgeable of complex disposal and transportation regulations, and through standing agreements, offer cost-effective waste disposal solutions.

RAILROAD SERVICES

Railroad support services are a large part of our business. Our employees receive specialized training, including E-Rail training and baseline OSHA Hazwoper training.

FACILITY SERVICES

BELFOR Environmental offers turnkey In-Plant Decontamination Services and Full or Partial Facility Decommissioning Services.

This includes the removal of asbestos, PCB, heavy metals, dioxins, acids/bases, organic solvents, petroleum, radioactive contaminants, and more.

We offer complete decontamination and demolition of tanks, piping, pumps, process equipment, structures, and most any surface. Our methods include power washing, solvent foam extraction, scarification, grit blasting, dry ice blasting and a variety of thin-layer removal techniques.
